

Course Development Proposal - Members Information Bulletin No. 12
23 December 2016

Members,

A brief note to keep members in the loop. I have this morning received an email from Sunshine Coast Regional Council, Strategic Planning Branch advising that the application for rezoning of Lot 152, where it is proposed to build the new holes for the Development, is not being progressed as a potential Round 3 amendment to the Sunshine Coast Planning Scheme 2014.

I'm sure this is hugely disappointing to the vast majority of members who supported the Development Proposal, in one form or another, as it is to myself and the whole Management Committee.

This decision obviously means that the Club loses out on getting new holes, new Clubhouse, practice facilities and financial security for the medium term.

The Council have offered to further discuss the issue, once we have had a chance to consider the advice. We will certainly be taking this opportunity, with the aim of getting this decision reversed. We will also be having discussions with the relevant Councillors.

Al Bruscheiler
President
